# P-14

# Capacitive Humidity Sensor

## Product

The P-14 humidity sensor was specially developed to satisfy the wide range of applications in the heating-ventilation and airconditioning sector. By the consistent use of state of the art production technologies and our extensive know-how in the field of high performance polymers, we have succeeded in producing a high quality sensor with an almost linear characteristic. The possibility for selecting the electrical connections provides users with ideal opportunities for implementing their own sensor design without limitation.

## Advantages

- Applicable in white goods, tests and measurement, HVAC technology, industrial
- Excellent long term stability
- Dewing resistant – fast recovering time after dewing, also at very high dewpoint temperatures
- High resistance to various chemicals
- Wide temperature operating range
- Various wired solutions available
- RoHs conform
